-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee (US 6,600,650) in view of Canfield (US 2001/0035095).

Lee teaches a device **40** (CPU) giving out heat inside an information product, a heat radiating sheet **20** stacked upon the device **40**, a heat-radiating fan **30**, and clamping arms **60** formed at two sides of the fan for clamping two sides of the sheet **20**. See Figures 3 and 4. Lee is silent with respect to a disk body containing a fragrance sheet disposed on the fan **30**.

Canfield discloses a disk body **10,14** receiving a replaceable sponge **12**. Note that Canfield discloses fragrant medium **12** “may be a circular, ceramic-based material with a porous structure that allows it to absorb various natural fragrances.” See paragraph [0013]. This teaching is interpreted to read on “sponge”. Canfield further discloses that the disk body “may be attached to any fan of an applicant or device so that the fragrant medium inside the assembled

container may be dispersed....For example, the container may be attached to a computer fan using any attachment means....” See paragraph [0014].

It would have been obvious to attach the disk body of Canfield to the computer fan of Lee, as doing so would enable distribution of the scent of Canfield through use of both forced air as well as waste heat generated by the CPU, thereby improving the scent distribution.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gardner et al. (US 2002/0146361) discloses an apparatus for dispensing a fragrance using the waste heat generated by a computer monitor. Okano et al. (JP 2003-15771) teaches a fragrance dispenser using waste heat generated by a computer CPU. Gummer et al. (GB 2330077) discloses a scent dispenser for attachment to a fan vent of a computer casing.
